- Understand The using of Widgets in Footer
- Understand how to install Plugins & Themes from WordPress Directory
- Create Your Post and understand the use of making Widgets in Website Footer

Reminder:

Understand the Problem statement and Complete the given task

Problem Statement:

As you know Themes and Plugins are necessary to make Website in a WordPress. As Theme display display the Apperance of your website as how its look in user window. On the other Plugins add Additional Functionality in your WordPress Website

Tips for the problem Solution's:

For Theme

A good Theme must be a good one that Compatible with your WordPress Version.

For Plugin

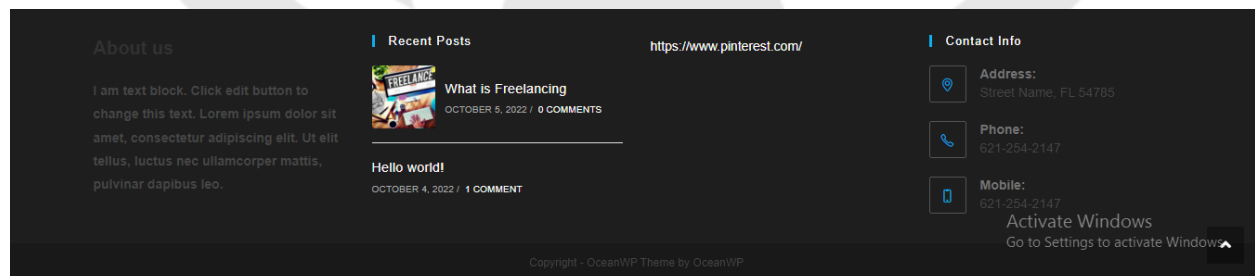

Plugin is also tested with your wordpress Version. Bcz Its necessary for the proper functioning

For Widget

Widget is important because. They make your site interactive and good looking specially to create a good footer its necessary to understand the importance of Widgets and Their usage. A good theme makes for you a good widget.

Tasks:

- Install and Activate a Theme in your Website Through WordPress Directory
- Install and Activate a Plugin in your website Through WordPress Directory
- Create a blog post as required Content
- Try to make a good footer using widget like given in image below

Note:

If you already have an installed plugin or theme DO NOT Activate another account

Requirements:

1. Screenshot(ss) of your installed and Activated plugin and Theme from WordPress Directory in WordPress dashboard.
2. Screenshot(ss) of your ever created Good looking blog post in your installed theme using block editor.
3. Screenshot(ss) of your WordPress created Widgets (Trying to make a sam as i mentioned in screenshot).

Guidelines:

- If you find to install a Theme Difficult then install “Asta” Theme in WordPress directory as it may make your work effiecient
- You can install “Contact form 7” plugin as it is easy to install and Activate if you find Difficult to install a plugin
- If you find to make a widget as i shown in image so hectic then dont be worry you can make a good footer as you wants. **But if you make that in scene told me the reason otherwise its get rejected.**
